Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The indicated allowability of claim 2 is withdrawn in view of the reference(s) to Kiyoyuki (JP 05-203948). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ohkawa (6,086,211), and further in view of Kiyoyuki (JP 05-203948).
4. Ohkawa discloses the claimed invention except for the recitation of a light storage material incorporated into the reflective film. Ohkawa discloses a light source, a light guide plate having opposed sides and being optically coupled to the light source for emitting light incident from the light source through one opposed side thereof said light guide plate being formed with convexes and concaves having different densities or sizes depending upon the distance from the light source on one side thereof and a reflective film which is disposed on the other opposed side of said light guide plate. Kiyoyuki discloses a planar light guide plate with a light source and a reflecting with a phosphor incorporated into it. It would have been obvious to one of ordinary skill in the art at the time the invention was made to implement the teaching of Kiyoyuki's light storage function of its reflecting plate in the reflective film of the light source device of

Ohkawa since as taught by Kiyoyuki, such a feature is purposeful for providing diffusive light to a light source device to promote an appearance of uniform luminance.

Allowable Subject Matter

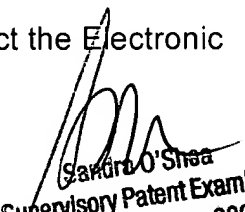

5. Claims 3-6 are allowed.
6. The following is a statement of reasons for the indication of allowable subject matter: The reasons can be found in the previous office action.
